I feel more confident in my ability
to make PowerPoint presentations
more accessible.

Strongly Agree/Agree **100%**

There was enough time for
questions.

Strongly Agree/Agree **100%**

COMMENTS

What other disability-related information could you benefit from learning about?

Formatting and exporting PDF's

Creating accessible social media content, general
accessibility best practices for the workplace.

What did you like best about the training?

A lot of information without being overwhelming.
Included stuff I can put into practice immediately, and
while we still have a lot to learn about accessibility, it feels
much less daunting and more attainable now.

Live demonstrations of PPT's accessibility features, as well
as her taking questions throughout the presentation.
Helped it feel very interactive!

Learning how to use the PowerPoint Accessibility Checker.
I did not know that was an available resource already built
in to PowerPoint and even Word.

What did you like least about the training?

Minimal interactive dialogue and/or exercises for end-user
to leverage for practice.

What were the key takeaways from this session?

How to describe images that should be alt-tagged and also
how screen readers prompt the "viewer" to differentiate
between images, links, etc.

Realizing we could provide supplemental materials that
were presented as images within the PPT but could be made
available as a screen reader-friendly PDF.

Meaningful hyperlinks, reading order, accessibility checker.

What could we have done better?

Data visualizations in PowerPoint. Strategies for doing this
in real-time while creating a PowerPoint.

Any additional feedback?

It gave me a lot of really useful, actionable information, and
left me feeling enthused and optimistic about improving
how we do things here. I think this could benefit a lot of
workplaces, and I plan to mention it to my friends.
